JUDINGROUP Agriculture Wire Weight Test Data Sheet

Testing time: 2 March 2022 **Tester:**

Test Purpose: Weight testing of agriculture wires		
Test Object: agriculture wires	Material: PET	Weight:10kg
	Shape: orbicular	Color: black
Test Equipment: Precision scales		

I. Test Methods and Procedures

1.Prepare the test equipment and ensure that it is calibrated accurately.

2.Remove the agriculture wire being tested and ensure it is in a dry condition.

3.Using precision scale measuring equipment, place the agriculture wire on the scale for measurement. Ensure that the agriculture wire is placed completely on the scale and is not affected by other objects.

4.Record the measurements and calculate the total weight.

II.Test data and Pictures

1. Product picture before test

2. Product picture and data after test

	
Summary of test data： Test data 1: 10.005kg Test data 2: 10.020kg Test data 3: 10.019kg Test data 4: 10.038kg Test data 5: 10.032kg Test data 6: 10.018kg	

III. Analysis of test results
Based on the test data, the average weight of the agriculture wire was 10.022kg . This result was compared with the standard requirements for analysis.

IV.Test Conclusion
Based on our test results and comparing the standard requirements, we conclude the following. The weight of the agriculture wire meets the specified value within the range of the standard requirements, which can be concluded as satisfactory.
